

## Company Fact Sheet

### Overview

Landkrone is one of the advanced manufacturers in oil and fat industry that aims to deliver custom-made quality product from Indonesia to the world. Production system is clean and efficient, inline with strict ISO rules and regulation. Building and the surroundings are designed to meet the most rigorous HACCP standard. With the adoption of advanced food production technology from Denmark, makes Landkrone flexible to adjust to any production method and quality. The pilot plant -the heart of research & development division- simulates actual production processes in smaller scale with smaller portion of material.
